Transforming Open Data into Strategic Intelligence

Azri delivers a rich knowledge discovery experience on IPP

The Innovation Policy Platform (IPP) is a joint initiative by The World Bank and OECD aimed at facilitating knowledge exchange and peer-to-peer learning on various policies specific to developed and developing countries. It aims to support policy making efforts by providing open-data access through a rich knowledge discovery layer on top of a data warehouse of all OECD and WB data, which in turn would transform them into strategic intelligence.

Azri executed the project with a partner technology company, where Azri developed the knowledge discovery layer which included an RDF driven Taxonomy & Search engine with advanced features to control facets using data from RDF files and enabling complex data visualization and graphical navigation across the platform.

Key Highlights

OECD.Stat integration & Data Warehousing of Open Data from multiple sources.

Advanced Data Visualization & Graphical Navigation.

Apache Solr Search extended with controls over facets using RDF file Metadata.

User focused content filtering and 'briefcase' feature.
